Sanity, Strapi, Shopify, WordPress

EDUCATION:

Master in Computer Science
COMSATS University Islamabad
(CUI), 2018

LANGUAGES:

English (Professional proficiency)

PROFESSIONAL SUMMARY:

I'm a dedicated Frontend Developer having over 4 years of experience. I specialize in React, Next.js, and Tailwind CSS, and have had the pleasure of working at companies Wishyoo and Ramper to bring their projects to life. My background also includes backend work with Express (Node.js) and Strapi/Sanity (Headless CMS).

I'm passionate about delivering high-quality solutions and love diving into new challenges. If you're looking for a reliable developer who's committed to your vision, let's connect and make it happen!

WORK EXPERIENCE:

FRONTEND DEVELOPER
Wishyoo, USA (Remote)
August 2020- August 2024

- Develop and maintain dynamic web applications using React and Next.js ensuring efficient performance and scalability
- Manage state with Redux and React Router for efficient data handling and component interaction.
- Developing new static pages in Next.js based on designs provided in Google Slides or Figma, ensuring seamless integration and optimal performance.
- Mentor junior engineers, conducting code reviews, providing technical guidance, and fostering a culture of continuous learning and improvement.

FRONTEND DEVELOPER
Nextbest, USA (Remote)
January 2021 - August 2021

- Helped in developing the frontend of an e-commerce website selling vintage clothing using React
- Styled components and crafted custom CSS to create a visually appealing and responsive user interface.
- Worked closely with designers to implement user-friendly interfaces and ensure design consistency.
- Optimized performance and enhanced user experience through efficient coding practices.

SOFT SKILLS:

- Client Communication
- Understanding Requirements
- Teamwork and Collaboration
- Self Motivation

WORK EXPERIENCE:

FULLSTACK DEVELOPER
Ipurvey, UK (Remote part-time)
August 2023 - July 2024

- Collaborate with the team at Ipurvey to develop multiple modules and pages using Next.js.
- Creating and implementing new pages and components within the Strapi CMS staging environment, followed by thorough testing prior to transferring these changes to the live production environment.
- Continuously enhance functionalities and user experience through iterative development cycles.
- Utilize React hooks and context API for state management and data handling

FREELANCE FRONTEND DEVELOPER
Upwork & Fiverr
2019 - Present

- Completed over 100 web projects, delivering high-quality solutions tailored to client needs.
- Specialized in custom WordPress and Shopify solutions, enhancing functionality and user engagement.
- Used animation libraries like GSAP and Framer Motion to create interactive user interfaces.

Key Projects

Wishyoo (main website)

- I worked on the Wishyoo main website, building it with Next.js. I utilized D3.js, Bootstrap, Redux, and various other libraries to achieve the project goals
- I created multiple static and dynamic pages integrated with APIs.
- I developed multiple REST APIs using Echo (Golang) and integrated them with the frontend of Wishyoo.

Ipurvey (main and sub websites)

- Developed multiple frontend pages using Next.js and Tailwind CSS, integrating their journey flow with backend APIs.
- Created the https://submissionpage.ipurvey.com/ site, integrating it with backend APIs. Managed error handling, stepper forms, and the display of errors and warnings.

Ourmaids

- Converted their existing website into React/Next.js using Tailwind CSS, GSAP, and AOS.
- Created multiple pages and integrated them with backend APIs to handle frontend entries from the contact form and booking page.

Key Projects

Nextbest (main website)

- Developed the frontend of their website using React, Bootstrap, and custom CSS for page design.

- Integrated APIs to manage comments and likes on their products.
